

The SpectroTouch Controller has the best overall control on the market because it controls multiple JumpLights Lighting product models simultaneously.

It is designed for easy-to-control Light Intensity, Spectrum, and Photoperiod at various plant growth stages to provide maximum crop yield and quality.

It provides control on its own or in conjunction with your existing lighting control system.

A single JumpLights controller can control up to 100 of both Under Canopy lights and Over Canopy Lights.

Controls Intensity, Spectrum, & Photoperiod

Specifications
